About the UK:

The **United Kingdom of Great Britain and Northern Ireland** is a country in western Europe, a Commonwealth Realm, and a member of the European Union and NATO. Usually known simply as the United Kingdom, the UK, or (inaccurately) as Great Britain, Britain or England (the most populous of the home nations), the UK has four constituent parts. Three of these — the ancient nations of England, Wales and Scotland — are located on the island of Great Britain. The fourth part is Northern Ireland, which is located on the island of Ireland. The capital of the UK is London.

The United Kingdom contains two of the world's most famous universities, the University of Cambridge, and the University of Oxford, and has produced many great scientists and engineers including Sir Isaac Newton, Charles Darwin, Michael Faraday, Paul Dirac and Isambard Kingdom Brunel amongst others; the nation is credited with the invention of the steam engine, locomotive, 3-piece suit, vaccination, lead crystal, television, radio, the telephone, submarine, hovercraft, and both the internal combustion and jet engines.
